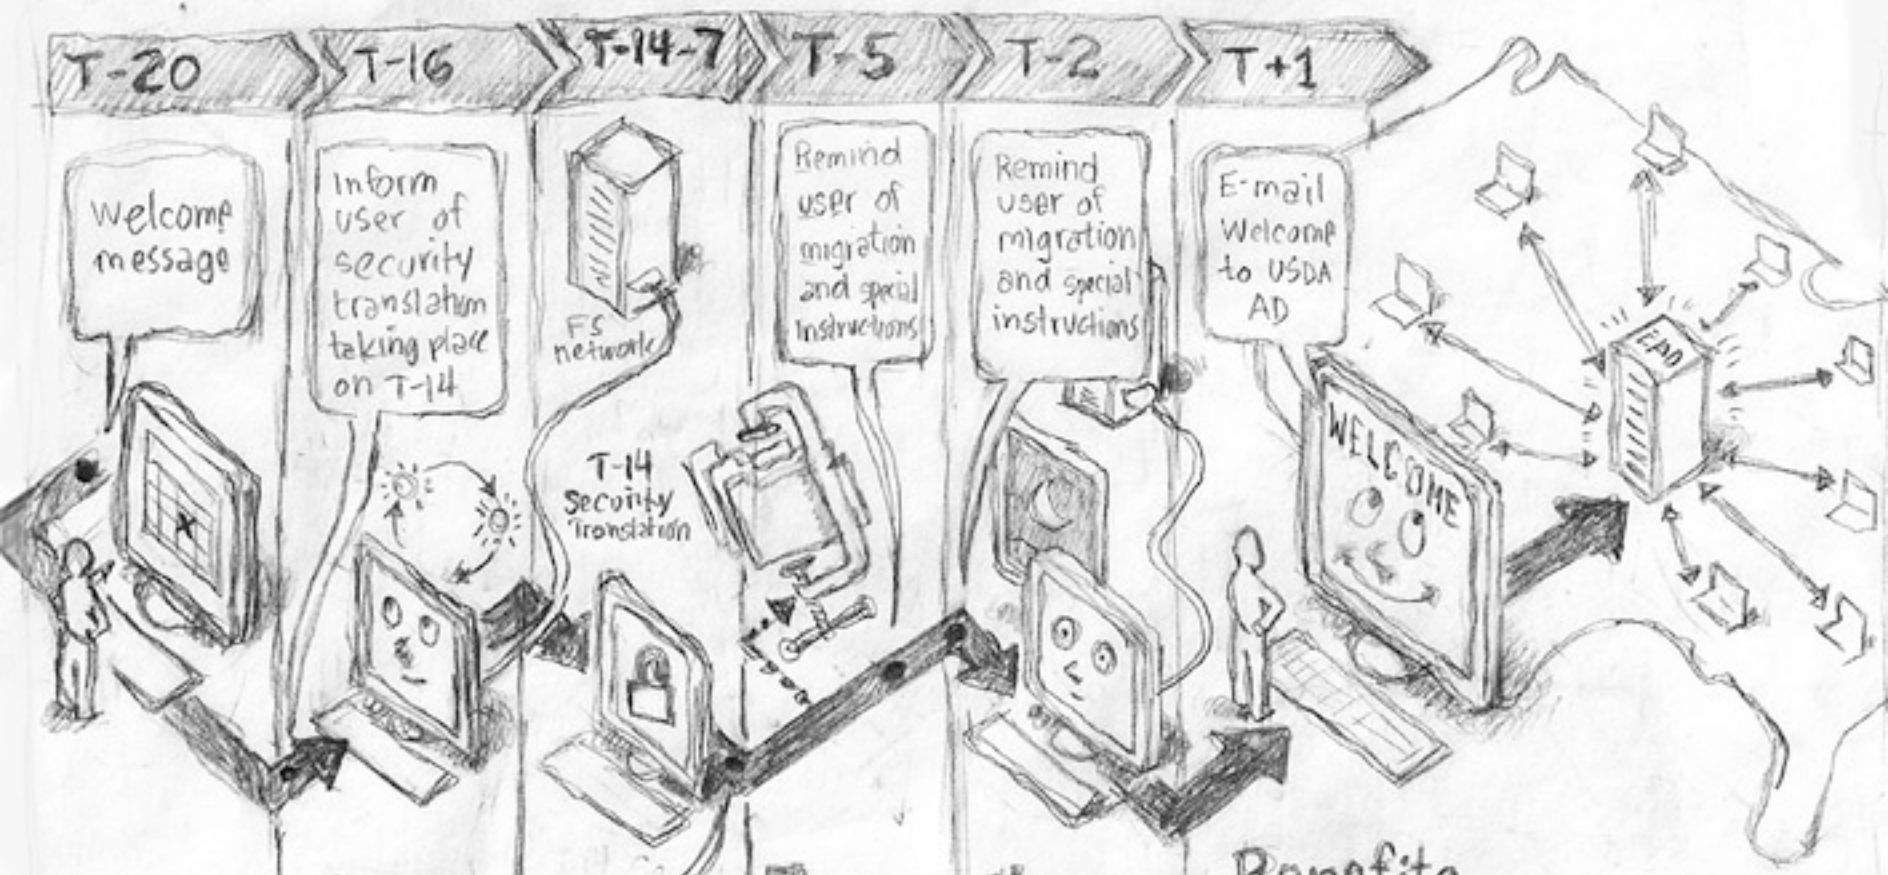
It's easy to migrate to the new, smarter EAD



1. User validate primary computer and migration date.

2. User connect computer to the FS network for two days.

T-7 Remind if security translation has not already taken place.

3. For a few users, make sure your data is unencrypted before you migrate.

4. On your scheduled migration date, leave your computer connected to the network overnight.

Benefits

- It's convenient:
- It's portable:
- It's efficient:
- It's secure:
- It knows how to share:
